

BUSINESS CARD SERVICE INC.

INTEGRATE - AUTOMATE

Because we care about you, we invest in you. We invest in partnerships and innovation by:

- Integrating with your system to AUTOMATE the process, freeing up your time and reducing your costs.
- Partnering with you to help sell new accounts by giving you options, samples, and advice.
- Helping you throughout the implementation process to ensure customer expectations are met.
- Earning your business every day through hard work and dedication.
- Learning more about you, so we can grow our businesses together.
- Continually investing in new technologies, automation, integrations, equipment, and products.

QUALITY & CONSISTENCY

BCSI takes print quality and color consistency to a new level. Our employees continually strive for perfection and have refined our quality control procedures throughout our 60 years of experience printing corporate identity products. BCSI's account set-up procedure, automated system, skilled operators, color control software, state-of-the-art equipment, and 14-point quality checklist eliminate variables throughout production and enable us to perform with 99.8 percent accuracy.

VALUE & FLEXIBILITY

We help discover the best print process to fit your customer's needs. BCSI offers traditional offset as well as digital capabilities to drive efficiency, quality and value. Our qualified specialists ask the right questions during the discovery process and provide you with options and samples, so you and your customer can make informed decisions.

Digital: In many cases, significant cost savings are achieved with our 4 color process program and premium paper stocks. We use HP Indigos to deliver the unmistakable look & feel of offset print with the advantages of digital equipment. The press uses ElectroInk liquid ink, not toner, to deliver the image quality and detail required for top quality and consistent color. When considering digital print, we will help you and your customer sort out the benefits and find the right solution.

Traditional Print: Our 2 and 4 color equipment continues to offer outstanding value and quality. Our highly trained and skilled operators and state-of-the-art equipment typically eliminate the need for preprinted shells and inventory. We also offer a wide array of processes, including thermography, foil stamping, embossing, engraving, and more.

PARTNER WITH US!

Together, we are a powerhouse in the marketplace for corporate business cards and stationery programs.
