

Add Variable QR Codes to Business Cards and other Print-on-Demand marketing collateral!

NEW TREND

- Ensure your contact info gets stored in the recipient's phone.
- Automatically generated and included in your on-screen proof.
- Added benefit = Accessible!

Does NOT require data, servers, or wi-fi to function.

The vCard QR Code will continue to generate contact info perpetually.
(not dependent upon subscription or ongoing service by a 3rd party)

Printed business cards and vCard QR Codes compliment each other because...

1. Physical business cards are tactile, tangible, and visible.

Printed business cards allow the recipient to use all their senses to create a memory of a brand and individual, instilling brand recognition and brand awareness.

YOU WILL NOT BE FORGOTTEN!

2. Printed vCard QR codes on business cards allow for easy digital storing of contacts.
